

Design Services

Virtually everything from print to web is created in digital file formats nowadays. But not every medium uses the same file types.

It's important that your design firm knows exactly what the optimum file format is for each application. This also includes working with existing artwork to make sure that it is appropriate for any given application. This investment will pay huge dividends because a professional appearance gets results.

We adapt our design rates to ensure that the proper expertise is utilized for your project.

DESIGN RATE	PER HOUR
Standard Design	\$60
Advanced Design	\$100
Structural Design	\$125

Design rates are listed on each sell sheet.
Please contact us for more information.

13. Design Services

*It's always great to save money,
but not when it looks like you did.*
